

Triumph Knee Brace

DCT-4552 The Trend Triumph Knee Brace is a double upright ligament orthosis that stabilizes and supports the knee and surrounding ACL, MCL, LCL, and PCL ligaments. The Trend Triumph Knee Brace frame, built of premium aerospace-grade aluminum, is light as air and incredibly strong, allowing patients to feel comfortable and confident while in motion or at rest.

Low Profile Hinge

Precision range of motion hinge is discrete and does not inhibit performance. 0-25 extension 0-90 flexion

Highlights

- Clinically tested to provide patients with support for improved knee and ligament stability
- Clinically tested as a preventative bracing solution for athletics
- Lightweight aerospace-grade aluminum frame
- One-step closure system for a consistent contoured fit
- Trend TX2 Non-Slip Padding minimizes brace migration and rotation

Indications

- Moderate to severe knee instability
- Stabilization of the ACL, MCL, PCL, & LCL
- Protection for surgical repairs and reconstruction
- Conservative treatment of ligament damage or deficiency
- Prophylactic bracing for athletic activities

Incredibly Strong

Lightweight Aerospace-grade Aluminum frame built for strength, durability, and performance

PDAC Approved: L1845/L1852
