Trend ActivAir Shield

DCT-SH61 The Trend ActivAir Shield Walking Boot combines hard-shell support with an adjustable pneumatic air bladder for a secure, customizable fit. An integrated air bulb allows compression to be adjusted to the desired level, while the padded liner and adjustable strap system help comfortably secure the foot and lower leg. Available in Short and Tall configurations.

Highlights

- Pneumatic Air Bladder
- Adjustable Compression
- Hard-Shell Support
- Secure Strap System
- Short & Tall Options

Indications

- Grade 2 and 3 ankle sprains
- Stable fractures of the foot and ankle
- Stress fractures of the lower leg
- Bunionectomies
- Metatarsal fracture, forefoot, mid-foot and hind-foot injuries

ADJUSTABLE PNEUMATIC SUPPORT

The integrated air bladder can be inflated using the built-in air bulb to create a snug, individualized fit. A simple valve allows air to be added or released as needed, providing easy adjustment throughout use.

Superior Post-Injury Support

ActivAir is a Post-Injury support boot that provides robust support and immobilization to aid in the recovery process post-injury or post-surgery.

PDAC Approved: L4360/L4361
