Maternity Brace

DCT-MTBF

The Trend Maternity Brace utilizes abdominal lift support combined with lumbar compression to address common pregnancy-related musculoskeletal conditions. In addition, the Trend Maternity Brace assists with diastasis recti support, pelvic tilt correction, and postural alignment without interfering with pelvic floor muscle activation.

Highlights

- Accommodates and supports abdominal changes, while maintaining fit
- Easily adjustable and secure fit to ensure comfort
- Helps patients stay active and comfortable throughout daily activities

Indications

- Lumbar-sacral support requiring sagittal and coronal control
- Reduction of load on intervertebral discs
- Support for pendulous abdomen associated with pregnancy or postpartum changes
- Postural support and spinal alignment from the sacrococcygeal junction to T9

Optimal Intracavity Compression

Clinically tested to provide intracavitary compression for effective pain relief

Hot/Cold Pack Available

PDAC Approved: L0637/L0650
